PROFILE

Tech Ops Specialist at Deccan AI experienced in working across **project, product, and engineering teams** to translate real-world requirements into practical technical solutions. Skilled in **Python, JavaScript, workflow automation, API integrations, data preparation, and AI systems**. Experienced in troubleshooting technical challenges, improving product capabilities, and supporting end-to-end project delivery. Strong at bridging **business requirements and technical execution** to deliver scalable, reliable, and user-focused solutions.

EXPERIENCE

Tech Ops Specialist – Deccan AI Automation Pvt Ltd, Hyderabad, India.

November 2025 – Present

- Partnered with **project, product, and engineering teams** to translate project requirements into technical solutions and workflows.
- Collaborated cross-functionally to deliver **30+ product features and enhancements**, expanding project configuration and template capabilities.
- Contributed to a **30% reduction in project setup time** by identifying bottlenecks and coordinating product improvements.
- Scaled organizational dataset adoption from **0 to 50+ datasets** through structured onboarding, transformation, configuration, and deployment.
- Configured and supported **100+ project workflows**, implementing business logic, validations, conditional behavior, and template configurations.
- Troubleshot annotation platform and integration issues with engineering teams and provided **project-driven feedback to improve product usability and reliability**.

Operations Associate – Deccan AI Automation Pvt Ltd, Hyderabad, India.

February 2025 – November 2025

- Completed **8,000+ AI annotations** across diverse datasets, maintaining accuracy and consistency against defined quality guidelines.
- Performed QC on **10,000+ annotated samples**, identifying errors and recurring issues to improve dataset quality.
- Researched and evaluated **10+ AI coding agents**, conducting comparative analysis beyond standard benchmarks.
- Developed and curated **RAG-based AI data samples** to support model evaluation and research initiatives.
- Identified operational challenges and **proposed 3 platform features** to improve workflow capabilities and address project-team requirements.

SKILLS

- **Programming:** Python, JavaScript, SQL, HTML, CSS
- **APIs & Tools:** REST APIs, Git, GitHub, Django, Bootstrap
- **AI & LLM:** RAG, Prompt Engineering, LLM Evaluation, Preference Ranking, AI Coding Agent Evaluation
- **Technical Operations:** Workflow Automation, API Integration, Data Processing, Data Validation, Debugging, Troubleshooting
- **Product & Delivery:** Requirement Gathering, Cross-functional Collaboration, Workflow Design, Process Improvement, Technical Problem Solving
